WEALTH STEERED RIGHT

A GITA-INSPIRED GUIDE · NSE

Trading the *Wealth Sarthi Way*

Price, volume & patience — told as a conversation between **a confused trader** and **his charioteer**.

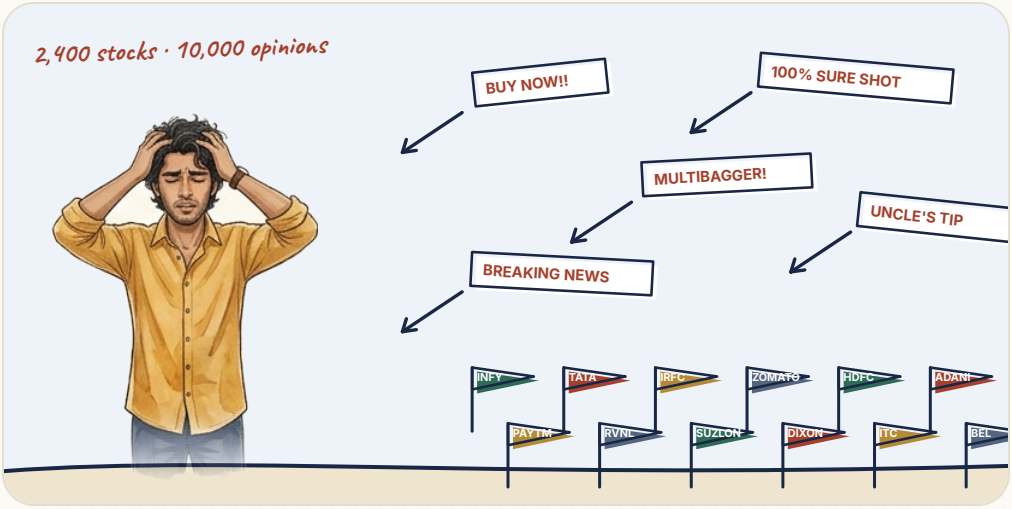

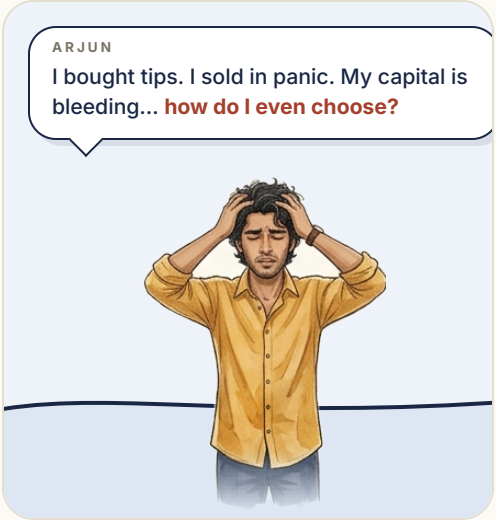

Cut the noise. Follow the system.

PROLOGUE · THE BATTLEFIELD

A market full of *noise*

Every trader stands on a battlefield called the market. Tips fly in from every side — and most of them are aimed at **your capital**.

WHY A SYSTEM

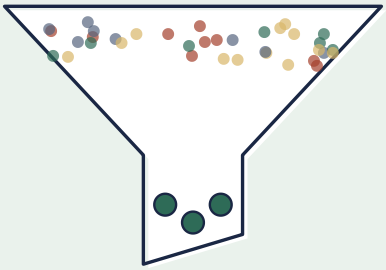

iii Noise vs *Focus*

NOISE

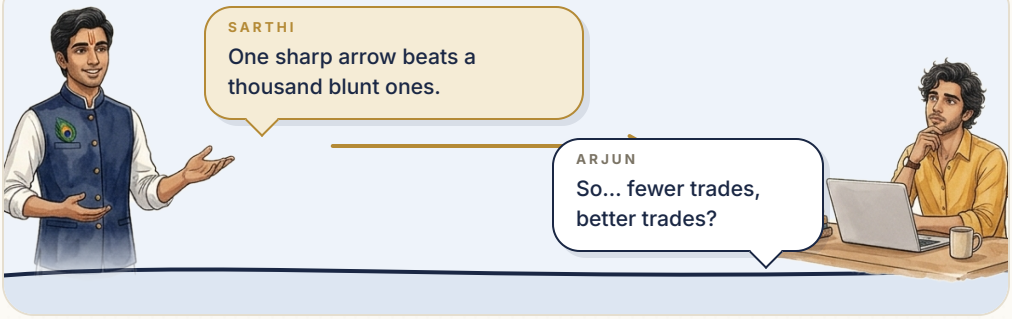

Every stock. Every tip. Every headline. No direction.

FOCUS

A few strong names, in strong groups, at the right time.

FROM THE FOUNDER

Why this book exists

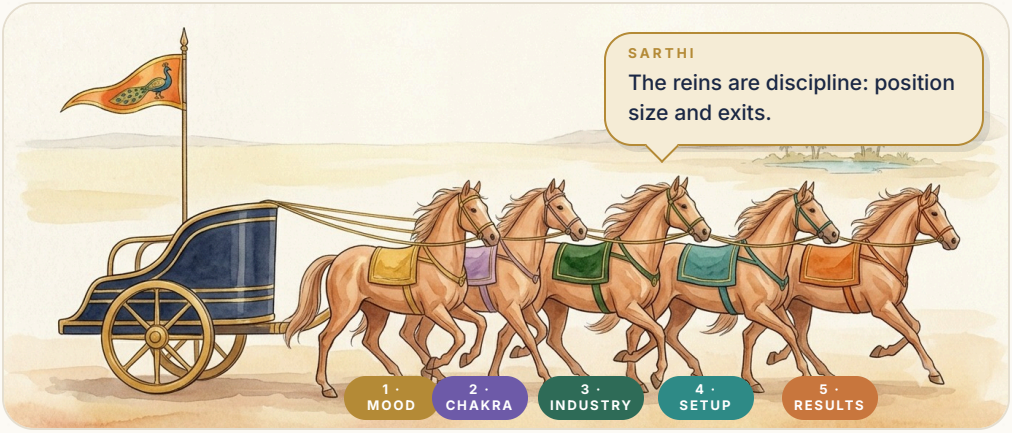

I started with mutual funds and stepped into direct equity in 2021. I made almost every mistake in this book: buying tips, averaging down, selling winners too early, sitting on losers too long. Wealth Sarthi was built from those corrected mistakes. It is a techno-funda system that reads **pure price and volume**, and it asks one question every evening: *where is the money moving, and should I attack or defend?*

— Tulshi, founder · The Wealth Sarthi

THE SARTHI PATH · THE MAP

iv Five *horses*, one chariot

Five horses pull the Sarthi chariot. If even one runs the wrong way, the chariot tips over. The reins are **discipline**: position size and exits.

BHAGAVAD GITA 18.78 · THE SARTHI PATH

HORSE ONE · READ THE WEATHER

01 Market Mood

Before you pick a single stock, look up at the sky. The market mood is **one score from 0 to 100**: attack, be choosy, or protect capital.

One score, three stances

SARTHI STANCE

Defend	Selective	Attack
below 40	40–60	60 and above

STANCE

Defend

No new trades. Trail your winners.

STANCE

Selective

Test the water: best setups, small size.

STANCE

Attack

Full trade. Above 80, book part profits.

What goes into the score

		WEIGHT
Volume thrust	big buying vs big selling	25
Leading industries	how many groups lead	20
Near highs	stocks near 52-week highs	20
Trend	small & mid-cap index vs its averages	20
Breadth	stocks above 20 / 50 / 200-day averages	15

HORSE ONE · DIRECTION BEATS THE NUMBER

01 Rising or *falling?*

ARJUN
Mood 48. Is that good or bad?

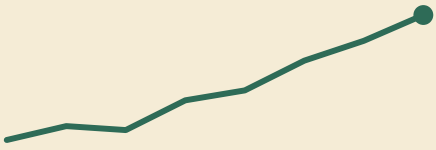

SARTHI
Ask: is it rising or falling?

48	50	47	52	55
54	58	61	60	63
66	65	69	71	70

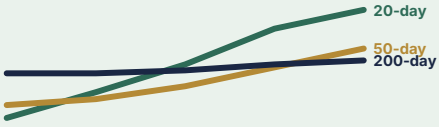

MOOD CALENDAR · GREEN BAR = UPTREND

THE CONCH SOUNDS

Mood rising day after day? Time to act is near.

BREADTH

20-day rises first, the 50-day follows: the army is regrouping.

मात्रास्पर्शास्तु कौन्तेय शीतोष्णसुखदुःखदाः । आगमापायिनोऽनित्याः

"Heat and cold, pleasure and pain come and go like the seasons. Bear them patiently."

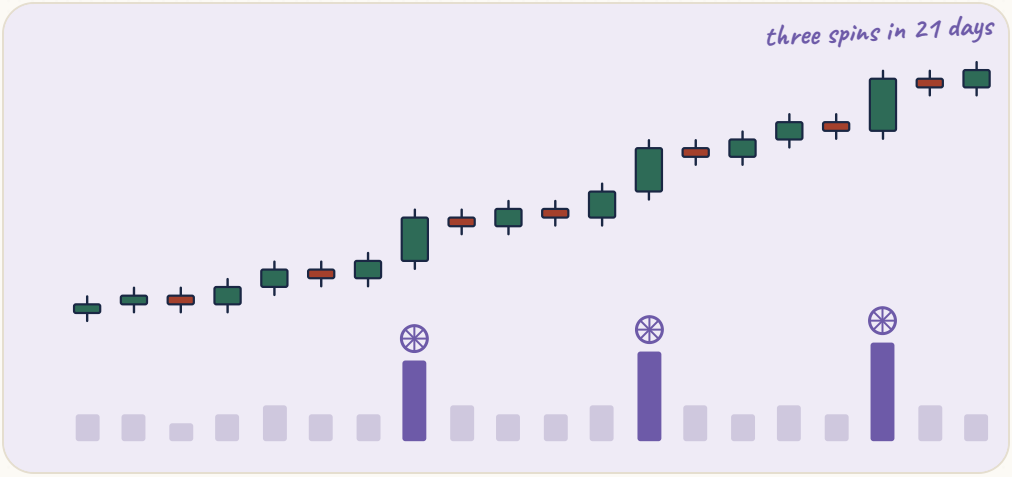

BHAGAVAD GITA 2.14 · MOODS COME IN SEASONS

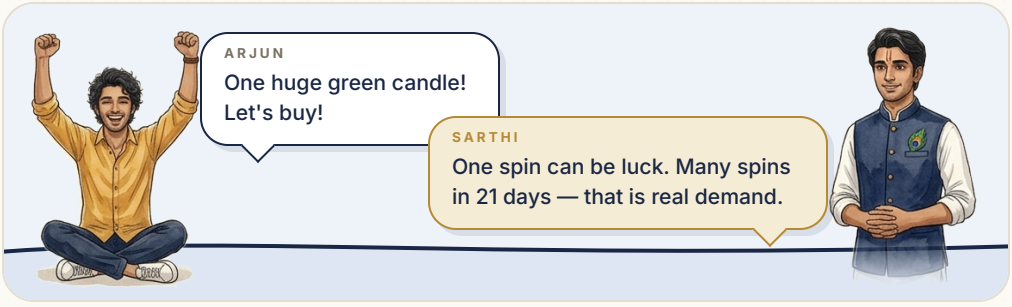

RULE
A rising 48 beats a falling 62. **Trade the direction, not just the number.**

HORSE TWO · HIGH PARTICIPATION

02 Sudarshan *Chakra*

A Sudarshan Chakra marks a day of **unusual buying**: a big up-move on unusually heavy volume.

○

1 spin

could be luck — note it

○○○

3 spins

buyers are coming back — watch

○○○○○

5+ spins

real, repeated demand — study it

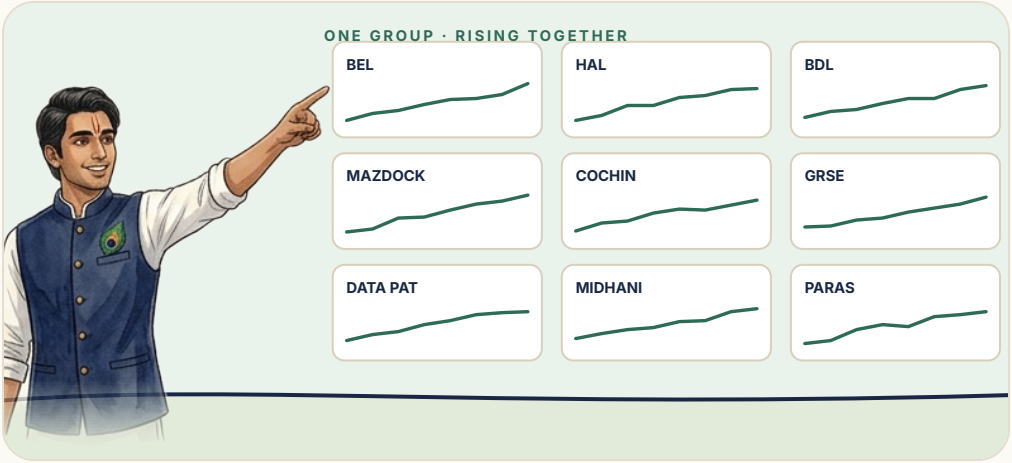

THE IDEA

The exact recipe stays in the Sarthi's quiver. The idea is what matters: **trade where price and volume are present, again and again.**

HORSE THREE · THE PHTM TEST

03 Strong *industries*

Stocks rarely win alone. When the strongest companies of a group rise, **the rest of the group follows**.

यद्यदाचरति श्रेष्ठस्तत्तदेवेतरो जनः

"Whatever the great ones do, others follow."

BHAGAVAD GITA 3.21 · THE HEART OF INDUSTRY STRENGTH

P Participation

How many companies of the group are rising on heavy buying — a crowd, not one outlier.

H Near highs

Are those risers still close to their best price of the year? Strength, not a dead-cat bounce.

T Thrust

Do the chakras repeat? One good day is luck; repetition is real demand.

M Money flow

Is more money trading in the group than it normally does?

LEADER · EMERGING · LONE LEADERS

03 Strong *armies*

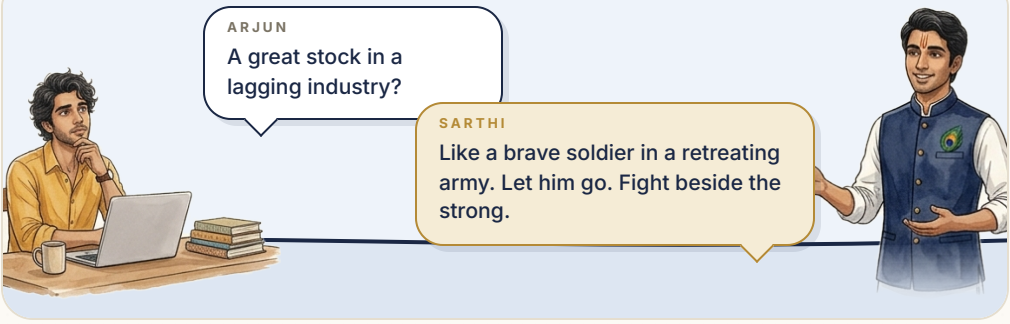

Leader
Strongest now. Fight here.

Emerging
Getting stronger. Get ready.

Neutral
Nothing special yet.

Fading
Was strong, now cooling.

Lagging
Weakest. Stay away.

THE SCANNER

Industry filter

Starts at **Leader + Emerging** (and lone leaders). Explore the rest when you choose.

- [ ] All industries
- [x] Leader
- [x] Emerging
- [x] Lone leaders
- [ ] Neutral
- [ ] Fading
- [ ] Lagging

THE EXCEPTION

Lone leader

A scout riding ahead of a Neutral army.

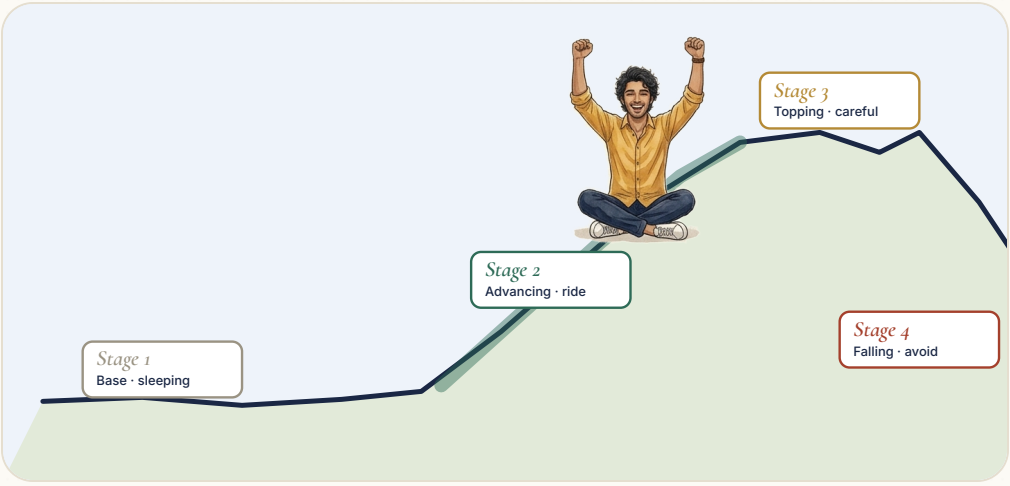

Strong stock, tradable setup, near its highs — **its group may follow next**.

"watch the scout, then the army"

HORSE FOUR · RIDE ONLY STAGE 2

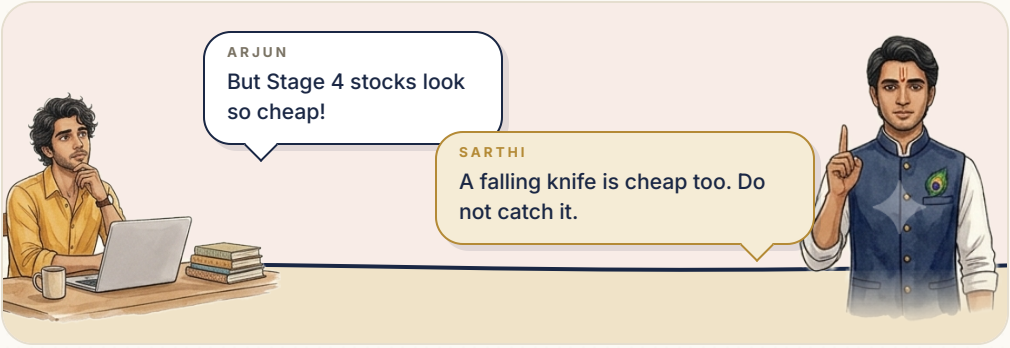

04 Tradable *setup*

Every stock lives in four seasons. We only ride in season two: **the slope going up**.

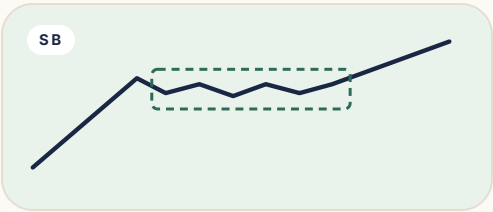

The Stage 2 test

- ✓ Price above the **10-week** and **40-week** moving averages
- ✓ The 10-week line above the 40-week line, both rising
- ✓ Stronger than the market: RS vs Nifty Smallcap 250 is positive
- ✗ Below the 40-week line, or the 40-week line falling = not Stage 2

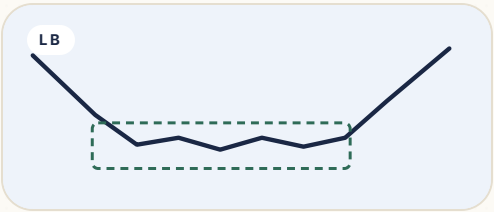

REST → STRENGTH

04 The four *setups*

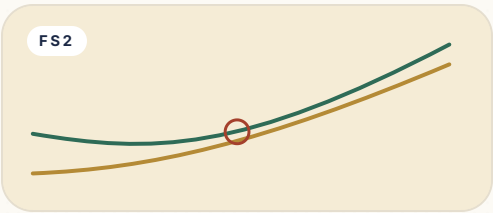

Short base

After a strong move, the stock rests in a tight range for a few weeks, then breaks out.

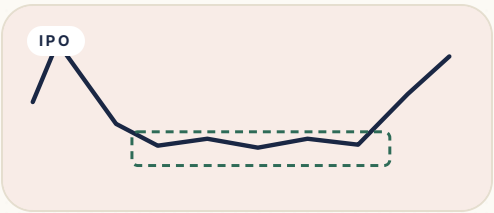

Long base

Months of sideways sleep while big buyers quietly collect. Then it wakes up.

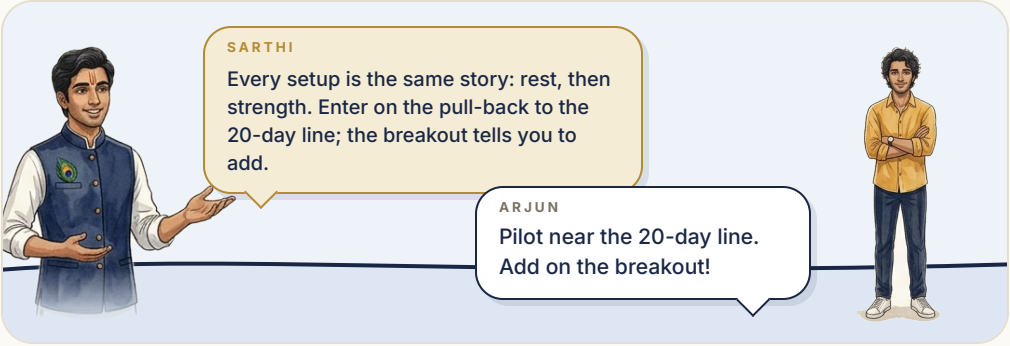

Fresh Stage 2

The 10-week line has just crossed above the 40-week line (in the last 8 weeks). A new up-season begins.

IPO base

A new listing falls after the debut excitement, builds a tight base, then turns up.

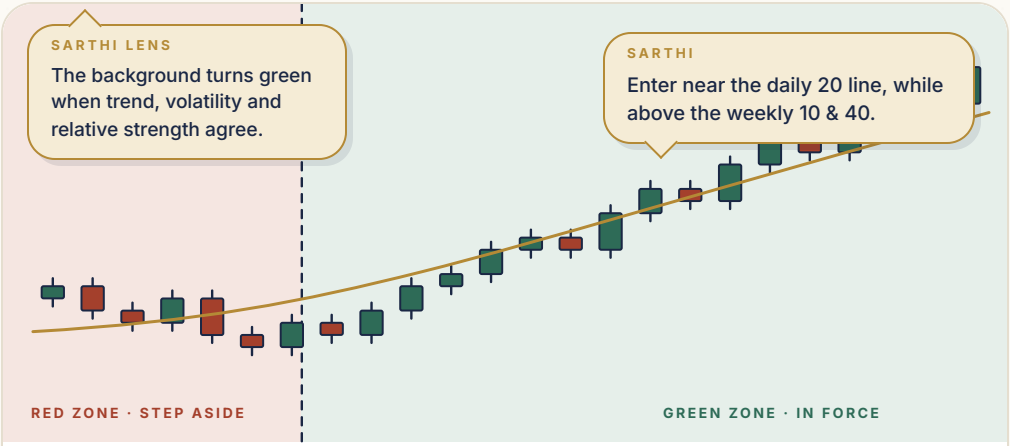

SARTHI SETUP ◆

Sarthi Setup ◆ ranks highest: a Stage 2 leader pulling back to its 20-day line, inside a base or a fresh trend, in a Leader or Emerging industry.

THE SARTHI LENS

Reading the *chart*

1 Moving averages

Daily **20** · Weekly **10 & 40** · Monthly **12/24/36** — the trend on three clocks.

2 Pocket pivots

Quiet up-days on bigger volume *inside* a base = someone is collecting.

3 10 EMA pull-back

A strong stock rests at its 10-day line, holds above the 20-day line, then turns up = a short swing entry.

4 Base breakout

Pilot near the daily 20 line. A close above the base high = confirmation to add.

5 Weekly A·B·C

Active A/B/C = buy zone. X/Y/Z = sell zone.

6 Chakras on chart

The more surge days, the stronger the demand behind the move.

THE RULE

Buy only when the background is green: **a small pilot first, add after confirmation, ride until it turns red.**

THE ARMOUR CHECK

Eight momentum *tiles*

SARTHI

Before battle, a warrior checks his armour. Before a trade, check the eight tiles.

STAGE 2 ✓ 6W

In Stage 2 for 6 weeks? The longer, the more mature.

RS SC250 +18%

Stronger than the Smallcap 250 index? Positive = leader.

D RVOL 164%

Today's volume vs usual. Above 100% = more interest.

BF% 24%

How far above the 66-day low. Shows the bounce already done.

LIQ NOW 42 Cr

Value traded in the latest candle.

LIQ THR. 35 Cr

Big-money mark. Liq above this = a high-value candle.

VWAP 1,284

Average traded price today. Close above = buyers in control.

ADR% 20D 4.2%

How much it moves in a day. Size smaller when it is wild.

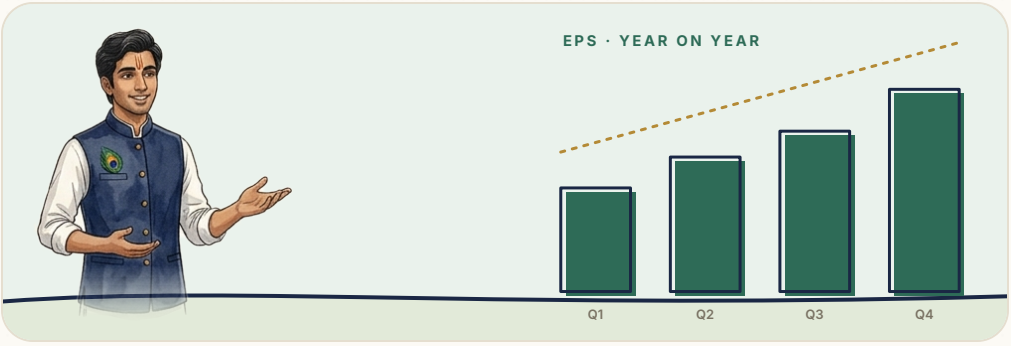

REMEMBER

No single tile decides. **Like armour, the pieces protect you together.**

HORSE FIVE · THE RESULTS BADGE

05 Sound *fundamentals*

A strong horse needs good fodder. A strong stock needs **growing earnings**.

Good results

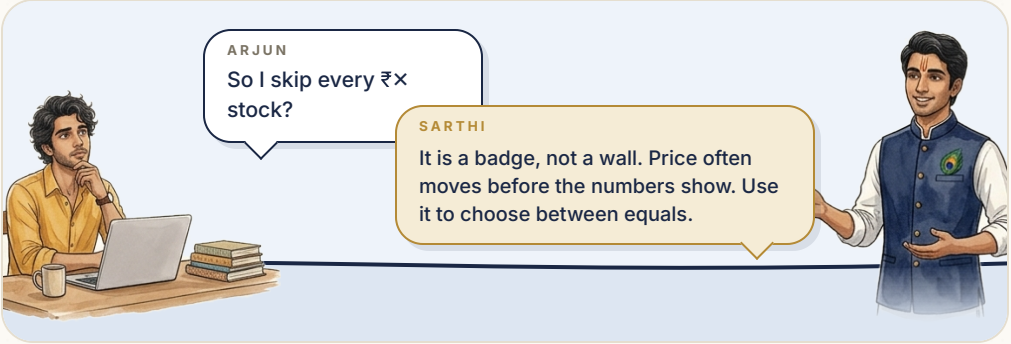

EPS up more than 15% year on year.

Okay results

EPS up 0–15%.

Weak results

EPS lower than a year ago.

Fundamentals pick the stock.
Technicals pick the time.

BHAGAVAD GITA 3.35 · YOUR SYSTEM BEATS SOMEONE ELSE'S TIP

THE REINS OF THE CHARIOT

Position *sizing*

Start small. **Add only when the market proves you right.**

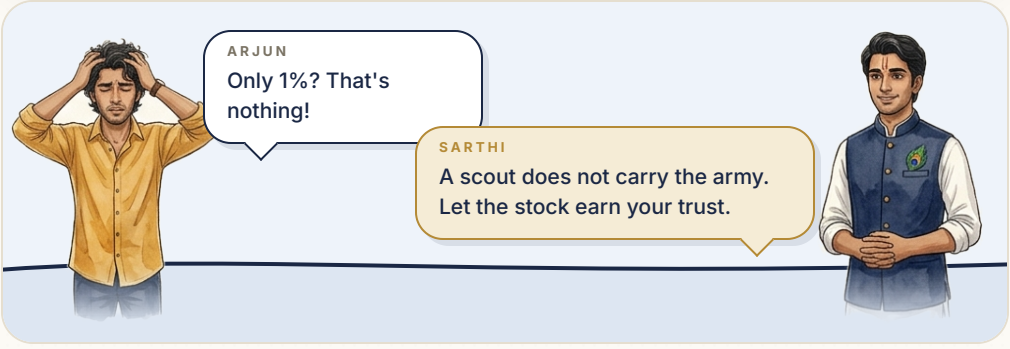

The pyramid rule

PER STOCK · % OF TOTAL CAPITAL

1. **1%** pilot when the setup triggers — stop **6%** below
2. **+2%** on a daily close above the **breakout** — now 3%, stop 6% below the average
3. **+2.5%** on each **higher weekly close** — after the first add the stop moves to **break-even**
4. Keep adding up to **15%**, then exit only on a red background. New? Start at **half size** (7.5%) for 20 trades

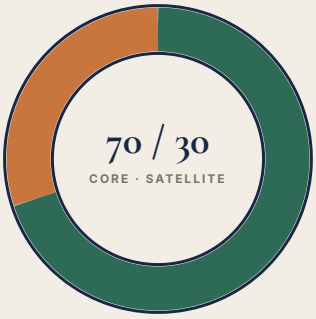

No breakout and it falls? Only the small pilot takes the stop. Add to winners — never to losers.

THE WHOLE FAMILY PORTFOLIO

Core & *satellite*

One family portfolio, two jobs: **a banyan tree that grows slowly**, and **swift horses that hunt**.

CORE · 70%

The banyan tree — grows slowly, quietly, for years.

SATELLITE · 30%

The swift horses — hunt the strongest trends.

CORE · 70%

The banyan tree

Up to **20 stocks**, about **5%** each. Chosen on **fundamentals**, entered on **technicals**. Reviewed monthly:

- **GREEN** new monthly high → add 1%
- **BLUE** sideways → wait
- **RED** no entry

Like your own SIP — built tranche by tranche.

SATELLITE · 30%

The swift horses

5–7 stocks from the Sarthi Path: chakras, strong industries, Stage 2 setups.

Sized in tiers: **10% · 15% · 20%** of the satellite bucket.

The pyramid rule still applies: pilot first, add on strength.

Faster in, faster out.

STEP OFF THE CHARIOT

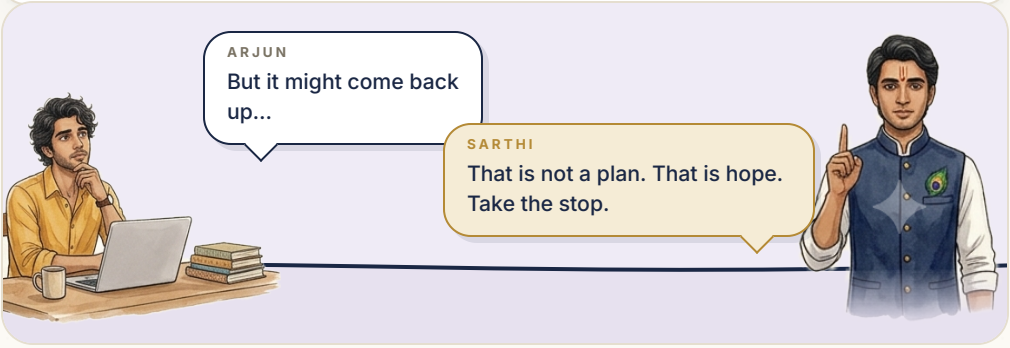

→ When to *exit*

The stop ladder

PLAN THE EXIT BEFORE YOU ENTER

1. **Pilot + breakout add**
   Stop **6%** below the average cost. Hit = out, no second chances.
2. **First weekly add done**
   Stop moves to **break-even** — the pilot's gain pays for the pyramid.
3. **Full pyramid on**
   No partial booking. Exit all when the weekly background turns **red**.

कर्मण्येवाधिकारस्ते मा फलेषु कदाचन

"Your right is to the action alone, never to its fruit."

THE FOUR DEMONS

The inner *battle*

The hardest enemies are not in the market. **They are inside the trader.**

सिद्ध्यसिद्ध्योः समो भूत्वा समत्वं योग उच्यते

"Stay even-minded in success and failure. That evenness is yoga."

BHAGAVAD GITA 2.48

FOMO

Chasing a stock already up 30% because everyone is talking about it.

Fear

Selling a healthy Stage 2 winner at the first red candle.

Greed

Skipping the pyramid and going all-in on day one.

Revenge

Trading bigger after a loss to 'win it back'.

BHAGAVAD GITA 6.5

The weekly review

FIVE HONEST QUESTIONS

1. Did I respect the market mood and stance?
2. Were my trades in Leader or Emerging industries?
3. Did I follow the pyramid — pilot first, add only on strength?
4. Did I exit when the path turned red, without arguing?
5. Which mistake will become a new rule?

CUT OUT AND KEEP

The ten Sarthi *sutras*

01 Read the **mood** before anything else.

02 Trade where **price and volume** are present — chakras.

03 Fight beside strong armies: **Leader + Emerging** industries.

04 Ride only **Stage 2**. Let falling knives fall.

05 **Enter** near the 20-day line. **Add** on the breakout.

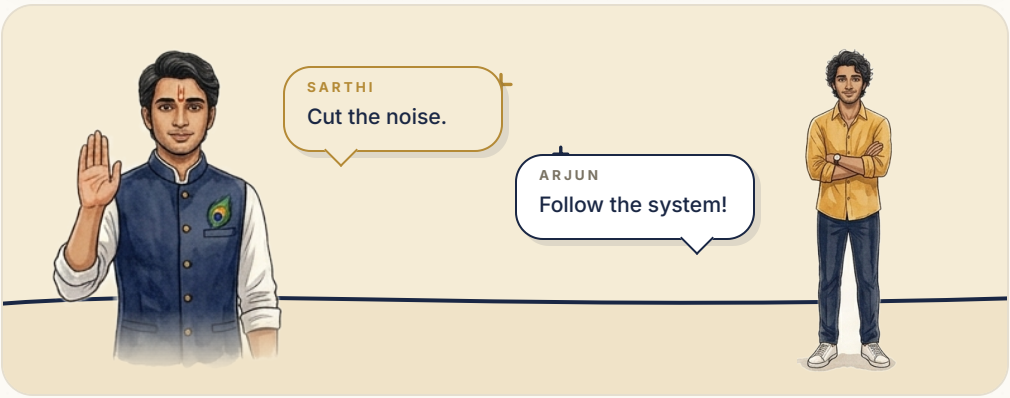

06 **Fundamentals** are a badge — technicals pick the time.

07 Start at **1%**. Add only on strength, up to 15%.

08 **Add to winners**, never to losers. Fresh cash → existing winners first.

09 Stop **6%**, then **break-even** after the first weekly add. Path turns **red** → step off.

10 **Ten minutes** every evening. Journal everything.

यत्र योगेश्वरः कृष्णो यत्र पार्थो धनुर्धरः । तत्र श्रीर्विजयो भूतिः
